***Applicant's Response***

1. In Applicant's Response dated 04/09/2008, Applicant amendments to the claims and provides corresponding arguments that are persuasive.

All objections and rejections previously set forth are withdrawn.

***Allowable Subject Matter***

2. Claims 1-5, 7-11, 13-17 are allowed.
3. The following is an examiner's statement of reasons for allowance

*Claims 1, 7 and 13*

The closest prior art of Springer et al (5936608), Brown et al (20030142140) teach processes of controlling the color of visual objects on the display. Springer teaches the process of varying the color to convey to the user the item that is in focus. Brown teaches the process of varying the color of an item for the purpose of conveying status to the user of a given task. Springer teaches a palette manager that can vary the brightness of a pixel on a screen. Brown teaches varying the pixel appearance through the alpha blending process where a fraction of the color of the transparent object is added to the color of the object below it. Neither Springer nor Brown are seen as disclosing obtaining a coefficient where the coefficient determines the brightness of the pixel and in response to an abnormal condition then decreasing the pixel brightness based on the coefficient by shifting the RGB value. Then tinting each pixel in a second area by adding an increment value and taking the claim as a whole, performing the above, wherein the first area and second area comprise all contents of the display screen, as recited in the claims is not seen as suggested or disclosed in the prior art. Thus the claims are allowable over the prior art.

*Claims 2-5, 8-11 and 14-17*

Art Unit: 2179

These claims are dependent upon Claims 1, 7 and 13, and are thus allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee.

Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
